## **2002 Virginia State Assessment Program Detailed Report**

### **EXECUTIVE SUMMARY**

During the period of September 15-October 15, 2002, the *Stanford Achievement Test Series*, Ninth Edition, Form TA, Abbreviated (*Stanford 9*) was administered to 269,926 students throughout Virginia in grades 4, 6, and 9. The *Stanford 9* consists of the following subtests: Reading Vocabulary, Reading Comprehension, Mathematics--Problem Solving, Mathematics--Procedures, Language--Prewriting, Composing, and Editing.

This was the fifth administration of the *Stanford 9* as the norm-referenced test used for the Virginia State Assessment Program (VSAP)—the first administration occurred in spring 1997 when *Stanford 9* was taken by students in grades 3, 5, 8, and 11. The second administration took place in fall 1998, and subsequent administrations occurred during fall semesters of 1999, 2000, 2001, and 2002 in grades 4, 6, and 9.

#### **Virginia's Performance Predominantly Above the National Average**

Percentile ranks provide an indication of the relative standing of a student or a group of students in comparison to students in the same grade who took the test at the same time of year. They range from a low of 1 to a high of 99, with 50 denoting average performance, and correspond to the percentage of students in the norm group who preformed at an equal or lower level on the test.

Virginia's fall semester percentile ranks are based on comparison to the fall, grades 4, 6, and 9 national standardization of *Stanford 9*. Table 1 on page 3, confirms that across the three grades tested, fall 2002 achievement was at or above the national average in 31 (94%) of the 33 *Stanford 9* subtests and content area totals.

---

## Summary of Virginia's Fall 2002 Performance

**Table 1 – Stanford 9, Fall 2002 Statewide Percentile Ranks**

	Grade 4	Grade 6	Grade 9
	2002	2002	2002
Reading Vocabulary	51	60	58
Reading Comprehension	55	59	61
<b>Total Reading</b>	<b>54</b>	<b>60</b>	<b>60</b>
Math:Problem Solving	67	72	65
Math:Procedures	57	60	39
<b>Total Mathematics</b>	<b>63</b>	<b>67</b>	<b>55</b>
Prewriting	58	43	50
Composing	57	58	54
Editing	65	62	51
<b>Language</b>	<b>63</b>	<b>56</b>	<b>52</b>
<b>Partial (Basic) Battery</b>	<b>60</b>	<b>63</b>	<b>57</b>

Following is a brief summary of Virginia students' fall 2002 performance against the *Stanford 9* national averages in grades 4, 6, and 9 (for details, see Table 2 on page 10):

- Overall, Virginia's fall 2002 achievement was *at or above* the national average in 31 (94%) of the 33 *Stanford 9* subtests and content area totals.
- In grade 4, achievement was *above* the national average in all 11 subtests and content area totals.
- In grade 6, achievement was *above* the national average in 10 of the 11 subtests and content area totals.
- In grade 9, achievement was *at or above* the national average in 10 of the 11 subtests and content area totals.

---

## 2002 Virginia State Assessment Program Detailed Report

### **Background and General Information**

The Standards of Quality require the State Board of Education to prescribe and provide nationally normed tests to assess the educational progress of students. The Virginia State Assessment Program (VSAP) is administered by the Virginia Department of Education in compliance with this requirement. The purpose of VSAP is to provide information on the academic achievement of Virginia's students compared to that of nationally representative samples of students in grades 4, 6, and 9.

In October 1996, the Board of Education adopted the *Stanford Achievement Test Series, Ninth Edition, Form TA, Abbreviated (Stanford 9)* as the norm-referenced test battery to be administered to students for VSAP. *Stanford 9* was first administered as part of VSAP in spring 1997 to students in grades 3, 5, 8, and 11, and the plan at the time was to administer *Stanford 9* in the same grades during the spring semester of each subsequent year. However, in early 1998 the Board of Education adopted a recommendation that norm-referenced testing instead be conducted during fall semesters. As a result, the planned spring 1998 administration of *Stanford 9* was suspended until fall 1998. To ensure that the same students who would have been tested in spring 1998 would be tested in fall 1998 (thus enabling establishment of baseline achievement data for that population), testing was moved from spring testing in grades 3, 5, and 8 to fall testing in grades 4, 6, and 9. Rather than moving grade 11 testing to grade 12, the Board of Education adopted another recommendation to cancel mandated norm-referenced testing at the upper high school level. The 2002 administration of the *Stanford 9* was the fifth to occur during the fall semester.

### **What Is a Norm-Referenced Test?**

A nationally norm-referenced achievement test measures a student's knowledge in broad content areas and provides a means by which the achievement of the student can be compared to that of other students in the same grade throughout the nation. This comparison is made possible by "norming" the test, which first involves administering the test at a specified time of year, in all grades and under standardized conditions, to a large sample of students referred to as the "norm group." Because this sample of students is selected by the test publisher to be representative of the nation's student population in terms of geographic region, rural, suburban, or urban classification, socioeconomic status (SES), and ethnicity, test results of the students in the norm group provide an estimate of student achievement across the nation. When the test is subsequently administered to other students at the same time of year, in the same grades, and under the same conditions, students' scores from those subsequent administrations can be compared to the scores of the students in the norm group. As a norm-referenced

---

test, scores obtained through administration of *Stanford 9* in VSAP reflect how well Virginia students performed relative to the students in the same grades, tested at the same time of year and under the same conditions, in the *Stanford 9* national norm group.

It is important to note that students cannot pass or fail a norm-referenced test. Instead, results from tests such as *Stanford 9* provide parents, educators, and the general public an objective measure of how well a student, school, school division, or state is achieving compared to a national sample.

### **The *Stanford Achievement Test Series, Ninth Edition***

Approximately 530,000 students participated in the 1995 norming of *Stanford 9*, establishing the scores against which Virginia's students have been compared in VSAP. Of those, approximately 200,000 took the test during the same fall testing window in which VSAP is administered.

Both the spring and fall national student samples for *Stanford 9* norming were balanced nationwide in terms of geographic region, socioeconomic status (high-, medium-, and low-SES), rural, suburban, or urban classification, and ethnicity. Forty-nine states and the District of Columbia were represented.

Prior to its publication and use in Virginia, precautions were taken to ensure that *Stanford 9* would be fair to all. A panel of prominent minority-group educators reviewed each test item, and statistical procedures were used to further ensure that items that might put any group of students at a disadvantage were not used in *Stanford 9*. Beyond eliminating bias, an effort was also made to balance references to minority groups and both gender groups. These steps were taken to ensure that *Stanford 9* is as free as possible from bias and objectionable content.

The specific form of *Stanford 9* administered in VSAP is Form TA, Abbreviated, which offers ample information on how well students perform compared to the norm group, yet requires a minimal amount of administration time. The levels of the test administered to Virginia's students are:

- grade 4 – *Primary 3*
- grade 6 – *Intermediate 2*
- grade 9 – *Advanced 2*

Local school divisions may test at grade levels other than those selected by the state, but such testing is optional and at local cost. However, to help ensure the reliability of VSAP results, *Stanford 9* Form TA, Abbreviated may not be purchased within the state of Virginia. Its use in the state is reserved solely for VSAP testing in grades 4, 6, and 9 by the Department of Education.

### **What Is the Content of *Stanford 9* Upon Which Students Are Tested?**

In VSAP, *Stanford 9* reading, mathematics, and language tests are administered to students in grades 4, 6, and 9 in all Virginia school divisions. Reading is assessed

---

through two subtests: Reading Vocabulary, which focuses on word knowledge, and Reading Comprehension, which measures how well students understand what they read. Two mathematics subtests are administered—Mathematics: Problem Solving, which focuses on reasoning skills, and Mathematics: Procedures, which measures the student's facility with computation. In the *Stanford 9* Form TA, Abbreviated Language test, students are presented with writing samples and asked to respond to questions in the areas of prewriting (use of resources, understanding topic relevance, and organization of ideas), and composing and editing (both of which include items based on printed rough drafts involving specific scenarios).

### **Who Is Tested on *Stanford 9*?**

All students enrolled in grades 4, 6, and 9 at the time of the VSAP administration are to be tested, including:

- any student with disabilities, unless the student is exempted as documented in his/her Individual Education Plan (IEP) or Section 504 management tool; and
- any limited English proficient (LEP) student, unless a committee responsible for the student's education determines that based on his/her fluency in English, taking the test will not be in the student's best interest.

Some students with disabilities and LEP students are provided with testing accommodations according to guidelines set forth by the State Board of Education. If a student is provided an accommodation that maintains the standardized conditions of *Stanford 9* (for example, a large-print copy of the test), the student's scores will be included in school, division, and state averages. If, however, an accommodation that does not maintain standard conditions is provided (such as allowing extra time to complete the test), the student will receive an individual score report, but his/her test results will not be included in school, division, and state averages.

For each student who does not take *Stanford 9*, the school division is required to provide the reason that the student has not been tested. Reasons include:

- disability status,
- limited proficiency in English,
- absence at the time of testing,
- refusal to take the test,
- disruptive behavior, or
- a medical emergency.

There may be other reasons why a given student may not take the test, but such a case would either be the result of an administrative error on the part of local staff or a case in which prior approval was given by the Department of Education.

---

## **How Are Scores Reported?**

Included in this report are the fall 2002 statewide national percentile ranks that allow comparison to the national norm group. The mean (or “average”) scaled scores from which the percentile ranks were derived are also included because they can be used to show gain/loss relative to previous administrations of *Stanford 9*.

### **Percentile Ranks**

Percentile ranks provide an indication of the relative standing of a student or a group of students in comparison to students in the same grade who took the test at the same time of year. They range from a low of 1 to a high of 99, with 50 denoting average performance, and correspond to the percentage of students in the norm group who performed at an equal or lower level on the test. For example, if a school division has a national percentile rank of 55, average performance in the division was equal to or better than 55 percent of the students in the norm group. Because a percentile rank of 50 denotes average performance, the division performed above the average. Percentile ranks should always be interpreted with reference to the norm group from which they were derived.

### **Scaled Scores**

Unlike percentile ranks, scaled scores are not dependent upon comparison to a particular norm group. As a result, scaled scores facilitate comparison of results regardless of the point of the school year at which the test is administered. In *Stanford 9*, each subtest and content area total has a single, continuous set of scaled scores, regardless of the subtest’s or total’s level or form, or whether the test was administered in the fall or spring semester. For example, the Reading Vocabulary scale is continuous across all levels of *Stanford 9*, allowing meaningful comparison of results from grade to grade, from one year to the next, and over a succession of years. Additionally, each continuous set of *Stanford 9* scaled scores is composed of approximately equal units, so that a difference of 15 scaled score points indicates approximately the same amount of difference in performance whether it is in the low, middle, or high range of the scale.

Given that each *Stanford 9* subtest’s and total’s score scale is continuous across levels and is made up of approximately equal units, examples of other comparisons that can be made for each student, school, school division, and the state, now and after future VSAP test administrations are as follows:

- growth (or decline) of achievement between the current year’s fourth, sixth, and ninth graders to previous years’ fourth, sixth, and ninth graders.
- growth (or decline) of achievement in ninth graders relative to sixth graders and/or fourth graders.

Finally, please note:

- Though scaled scores will allow comparison *within* a given subtest or content area total, they are *not* equivalent from one subtest or total to another. Scaled scores cannot, for example, be used to reliably determine whether a student or group of students is stronger in reading than in mathematics.

- 
- The publisher of *Stanford 9*, Harcourt Educational Measurement, has not developed a scaled score range for the Partial (Basic) Battery for Form TA, Abbreviated administered in VSAP. Therefore, scaled score comparisons for VSAP can only be made within subtest and content area totals.

### **Virginia's Overall Performance**

#### Percentile Ranks

The percentile ranks can be used to reliably compare Virginia's 2002 achievement to that in previous years. Table 2 in Appendix A displays the percentile ranks for grades 4, 6, and 9 from the 1998 through 2002 VSAP administrations.

#### Scaled Scores

The best available measure of change across all administrations of VSAP is the scaled score. Table 3 in Appendix A displays the mean ("average") statewide scaled scores from the 1998 through 2002 VSAP administrations.

---

## Achievement Summary

### Summary of Overall Performance

- Virginia's grade 4 achievement in 2002 was above the national average (50<sup>th</sup> percentile) in all subtests and totals.
- Fourth grade scaled scores in 2002 were above those in 2001 in all subtests and totals.
- From 1998 to 2002, grade 4 students have shown *gains* in all subtests and content area totals for which *Stanford 9* scaled scores have been developed.
- Virginia's grade 6 achievement in 2002 was above the national average in all subtests and totals with the exception of *Prewriting*, 2002 achievement in this subtest remained at the 43<sup>rd</sup> percentile rank.
- In grade 6, scaled scores for the *Prewriting* subtest have shown no significant changes since 1998.
- Compared to 2001, scaled scores in 2002 for grade 6 students were up in all subtests and totals with the exception of *Prewriting*.
- From 1998 to 2002, grade 6 students have shown gains in all subtests and content area totals for which *Stanford 9* scaled scores have been developed.
- Virginia's grade 9 achievement in 2002 was at or above the national average in all subtests and totals with the exception of Mathematics: Procedures. In 2002, achievement in this subtest was at the 39<sup>th</sup> percentile.
- In grade 9, a *gain* has continued since 1998 in *Mathematics: Problem Solving*, while a *decline* has been seen in *Mathematics: Procedures*.
- Compared to 2001, ninth grade scaled scores in 2002 were slightly up in two and slightly down in seven of the subtests and content totals.

---

### **Subgroup Performance: Gender (Grade 4)**

Table 4 provides the following data for grade 4 students by gender: the total number tested and the group's national percentile rank.

**Table 4 – Stanford 9, Fall 2002, Statewide National Percentile Ranks (PR) by Gender, Grade 4**

Gender Number Tested	Female	Male
	40,520	40,275
PR	PR	
Reading Vocabulary	52	51
Reading Comprehension	58	52
<b>TOTAL READING</b>	<b>57</b>	<b>52</b>
Math: Problem Solving	67	69
Math: Procedures	57	57
<b>TOTAL MATHEMATICS</b>	<b>62</b>	<b>63</b>
Prewriting	59	56
Composing	60	55
Editing	68	61
<b>LANGUAGE</b>	<b>66</b>	<b>59</b>
<b>PARTIAL (Basic) BATTERY</b>	<b>61</b>	<b>59</b>

- Males and females scored above the national averages in all subtests and content areas in grade 4.
- Females scored *higher* than males in grade 4 in *Reading Vocabulary, Reading Comprehension, Total Reading, Prewriting, Composing, Editing, Language, and Partial Battery*.
- Males scored *higher* than females in *Mathematics: Problem Solving and Total Mathematics* in grade 4.

## Subgroup Performance: Ethnicity (Grade 4)

Table 5 provides the following data for grade 4 students by ethnicity: the total number tested and the group's national percentile rank.

**Table 5 –Stanford 9, Fall 2002, Statewide National Percentile Ranks (PR) by Ethnicity, Grade 4**

Gender/Ethnicity	American Indian/ Alaskan Native	Asian / Pacific Islander	Black	Hispanic	White	Ethnicity not identified
Number Tested	<b>303</b>	<b>3,296</b>	<b>22,365</b>	<b>3,513</b>	<b>49,500</b>	<b>2,041</b>
	PR	PR	PR	PR	PR	PR

Editing	65	81	51	58	70	63
<b>LANGUAGE</b>	<b>62</b>	<b>77</b>	<b>48</b>	<b>56</b>	<b>68</b>	<b>61</b>
<b>PARTIAL (Basic) BATTERY</b>	<b>59</b>	<b>73</b>	<b>43</b>	<b>52</b>	<b>66</b>	<b>58</b>

- American Indian/Alaskan Native students in grade 4 scored *above* the national average in all of the subtests and content area totals.
- Asian/Pacific Islander students in grade 4 scored *above* the national average in all of the subtests and content area totals.
- Asian/Pacific Islander students in grade 4 scored *above* other ethnic groups in all of the subtests and content area totals except two: *Reading Vocabulary* and *Total Reading* in which White students scored higher and the same, respectively.
- Black students in grade 4 scored *below* the national average in all of the subtests and content area totals except *Editing*.
- Hispanic students in grade 4 scored *above* the national average in all of the subtests and content area totals except in *Reading Vocabulary*, *Reading Comprehension*, and *Total Reading*.
- White students in grade 4 scored *above* the national average in all of the subtests and content area totals.

---

## **Subgroup Performance: Students with Limited English Proficiency (Grade 4)**

Table 6 provides the following data for grade 4 students identified as having limited proficiency in English: the total number tested, the group's national percentile rank, and the group's mean scaled score.

**Table 6 – Stanford 9, Fall 2002, Statewide National Percentile Ranks (PR)  
and Mean Scaled Scores (SS) for Students with  
Limited English Proficiency (LEP), Grade 4**

Number Tested *		<b>1,634</b>	
PR	SS		
Reading Vocabulary	29	601.6	
Reading Comprehension	37	615.0	
<b>TOTAL READING</b>	<b>33</b>	<b>610.0</b>	
Mathematics: Problem Solving	58	625.1	
Mathematics: Procedures	59	600.8	
<b>TOTAL MATHEMATICS</b>	<b>57</b>	<b>613.5</b>

**NOTES:**

\* To maintain confidentiality of individual students' results, a given subgroup's summary data are not presented for any subtest or subject area total that is taken by 10 or fewer students in the subgroup.

**N/A** Scaled scores are not available for the *Stanford 9* Partial Battery.

---

### Subgroup Performance: Gender (Grade 6)

Table 8 provides the following data for grade 6 students by gender: the total number tested and the group's national percentile rank.

**Table 8 –Stanford 9, Fall 2002, Statewide National Percentile Ranks (PR) by Gender, Grade 6**

Gender	Female	Male
Number Tested	42,720	42,801
PR	PR	
Reading Vocabulary	62	58
Reading Comprehension	62	55
TOTAL READING	<b>63</b>	<b>57</b>
Math: Problem Solving	72	72
Math: Procedures	61	58
TOTAL MATHEMATICS	<b>67</b>	<b>66</b>
Prewriting	45	40
Composing	62	55
Editing	68	57
LANGUAGE	<b>61</b>	<b>50</b>
PARTIAL (Basic) BATTERY	<b>65</b>	<b>61</b>

- Females scored *above* the national averages in all subtests and totals except *Prewriting* in grade 6.
- Males scored *above* the national averages in all subtests and totals except *Prewriting* and *Language* in grade 6.
- In grade 6, females scored *higher* than males in all subtests and content area totals with the exception of *Mathematics: Problem Solving* in which they both scored in the 72<sup>nd</sup> percentile.

## Subgroup Performance: Ethnicity (Grade 6)

Table 9 provides the following data for grade 6 students by ethnicity: the total number tested and the group's national percentile rank.

**Table 9 – Stanford 9, Fall 2002, Statewide National Percentile Ranks (PR) by Ethnicity, Grade 6**

Gender/Ethnicity	American Indian/ Alaskan Native	Asian / Pacific Islander	Black	Hispanic	White	Ethnicity not identified
Number Tested	<b>463</b>	<b>3,432</b>	<b>23,498</b>	<b>4,033</b>	<b>52,442</b>	<b>1,999</b>
	PR	PR	PR	PR	PR	PR

<b>LANGUAGE</b>						
<b>PARTIAL (Basic) BATTERY</b>	<b>56</b>	<b>76</b>	<b>44</b>	<b>56</b>	<b>70</b>	<b>63</b>

- American Indian/Alaskan Native students in grade 6 scored above the national average in all subtests and content area totals with the exception of *Prewriting* and *Language*.
- Asian/Pacific Islander students in grade 6 exceeded the national average in all subtests and content area totals and scored above other ethnic groups in all of the subtests and content area totals except *Reading Vocabulary* in which White students scored higher.
- Black students in grade 6 scored at the national average in *Mathematics: Problem Solving* and below the national average in all other subtests and content area totals.
- Hispanic students in grade 6 scored at or above the national average in nine of the subtests and content area totals.
- White students in grade 6 scored above the national average in all subtests and content area totals with the exception of *Prewriting*.

---

## **Subgroup Performance: Students with Limited English Proficiency (Grade 6)**

Table 10 provides the following data for grade 6 students identified as having limited proficiency in English: the total number tested, the group's national percentile rank, and the group's mean scaled score.

**Table 10 – Stanford 9, Fall 2002, Statewide National Percentile Ranks (PR) and Mean Scaled Scores (SS) for Students with Limited English Proficiency (LEP), Grade 6**

**NOTES:**

\* To maintain confidentiality of individual students' results, a given subgroup's summary data are not presented for any subtest or subject area total that is taken by 10 or fewer students in the subgroup.

N/A Scaled scores are not available for the *Stanford 9* Partial Battery.

### School Division Performance

Table 16 in Appendix B includes the national percentile rank for each subtest for each Virginia school division and schools within the division that administered the *Stanford 9* test. Also reported in this table are the number and percent (based on *enrollment*) of students in grades 4, 6, and 9, in each school and school division, that participated in one or more of the subtests under standard conditions.
